SELECTED PROJECTS

Yelling Ant · Senior Software Engineer

2025 — Present · Remote

A Reddit-style community platform built end to end: communities, posts, nested comments, profiles and moderation. Includes a personalized For You feed, Hot/New/Top/Controversial ranking, Elasticsearch-powered search, and a React client with infinite scroll, optimistic voting and live comments over WebSockets.

`Python · FastAPI · React · TypeScript · Redis · Elasticsearch · WebSockets · AWS · Docker`

Roomsss · Engineering Manager

2023 — 2026 · Remote

Platform delivery across frontend and backend teams: a Next.js micro-frontend architecture, microservices in Python, Go and Node.js, and agentic AI workflows with tool calling, orchestration and guardrails. Agent interfaces stream responses and show tool-call traces with human-in-the-loop approval.

`Next.js · React · Python · Go · Node.js · LLM Agents · OpenAPI · gRPC`

SecursUs · Senior Software Engineer

2021 — 2025 · Remote

Built end to end: a Next.js frontend on Python microservices, each owning a single feature, its own data store and deployment. Typed OpenAPI contracts, an API gateway for routing, auth and rate limiting, and async messaging between services for events and background work.

`Next.js · Python · Microservices · OpenAPI · API Gateway · Docker · GitHub Actions`

Pixado · Senior Software Engineer

2018 — 2021 · Remote

A platform that creates illustrated children's books with AI. A parent or child enters an idea and gets a complete story, illustrations and a print-ready book, with reading-level checks, age-appropriate content filters and characters kept consistent across pages.

`LLMs · Image Generation · Prompt Pipelines · Content Filtering`
